

## **Airspan Chooses Artiza Networks as Supplier of eNB Testing Solutions**

TOKYO, Japan. October 21, 2011 – Artiza Networks, Inc., a leading provider of the 3G/LTE radio access network (RAN) testing solutions, is pleased to announce that Airspan Networks Inc., a global vendor of 4G broadband wireless products and solutions, has chosen Artiza Networks to provide LTE Testers, complete load testing systems for LTE Evolved Node B (eNB).

LTE eNB is a base station that manages radio resource and mobility in the cell and sector to optimize all user communications in radio access networks. The performance of LTE eNB heavily depends on a radio resource management algorithm and its implementation. Artiza's LTE Tester DuoSIM provides the complete solution for LTE eNB. Artiza LTE Tester DuoSIM is a single hardware solution based on ATCA platform, which simulates Uu and S1/X2 interfaces. It enables simulation not only for the wireless terminal but also for the wired network side, and becomes the complete environment for wrap-around testing for LTE eNB.

Artiza's LTE Tester DuoSIM is used by Airspan Networks for testing LTE equipment, including its leading AirSynergy 4G LTE eNB broadband wireless infrastructure product.

LTE is a global standard for the next generation mobile network, and the Artiza's LTE eNB Load Tester will bring the ultimate testing environment with the toughest load condition to help improve the reliability of the LTE service.

### **About Airspan Networks**

Airspan Networks is a global provider of 4G broadband wireless systems and solutions that deliver high-speed data, voice and multimedia services. Airspan's products serve operators and vertical markets such as smart utilities, transportation and public safety around the world in both licensed and unlicensed frequency bands covering from 700 MHz up to 6 GHz. Its products have been deployed in over 100 countries by 500 operators, 100 of which use Airspan's 4G products. For more information, please visit <http://www.airspan.com>.

### **About Artiza Networks**

Artiza Networks is the leader in 3G/LTE radio access network (RAN) testing. Artiza has been collaborating in RAN nodes/core network nodes testing with major operators and vendors in the most advanced market in the industry for more than 10 years. Artiza's tester products have been

dominating the Japan market by high density load testers. Artiza has filed in Tokyo Stock Exchange in 2001. More information about Artiza Networks (TSE: 6778) is available at <http://www.artizanetworks.com>.
